Comparisons - Lumion Studio vs Lumion Pro vs Lumion View

What is Lumion Studio?

Lumion Studio is the complete package of Lumion's visualization tools, built to support your design process from start to finish. It includes:

- **Lumion Pro** as a **floating license**, so your team can share access across multiple users.
- **Lumion View** as a **named-user license**, with the option to invite up to 10 team members per Studio seat—**free** until October 31, 2025.

With **Lumion Studio**, your team gets the flexibility to collaborate smoothly, whether you're shaping early concepts or finalizing high-quality renders.

What is Lumion Pro?

Lumion Pro is a complete architectural rendering software that gives you full control over context, materials, lights, effects, realism, and output.

Lumion Pro is available both as a named-user license, or as a floating license, included in Lumion Studio.

What is Lumion View?

Lumion View is an early-stage design companion for real-time visualization inside SketchUp.

- You can easily get Lumion View as a standalone subscription.
- Lumion view is also included in the Lumion Studio plan. Plus, with Lumion Studio, you can invite up to 10 Lumion View users for every seat you have—completely free until October 31st 2025.
