HunarPro Skilling Partnership Brings Studica Products to India

May 18th, 2020, Mississauga, Canada – Studica Limited is pleased to announce a partnership with HunarPro Skilling Hub Pvt Ltd. This partnership will allow for the distribution of the entire range of Studica Robotics products in Western India. This agreement will cover the areas of Goa, Gujarat, and Maharashtra. We are pleased to be able to be a part of this partnership that supports the skill mission in India helping students and competitors succeed in WorldSkills Robotics and related international robotics competitions.

“At Studica, we continually strive to develop innovative robotics skills across the globe. We constantly research, listen, and learn so we can provide the best technologies. We are proud to be working with HunarPro Skilling to bring our powerful solutions to India. Our WorldSkills Collection products, VMX offerings, Studica accessories, and other products will now be available to Western India, sold and supported by HunarPro Skilling.” said Frank Nanfara, President & CEO, Studica.

This is a natural and propitious match as both Studica and HunarPro Skilling are dedicated to working with robotics education and research. HunarPro Skilling is an Academic & Industry Partner for WorldSkills India. Studica is a proud Global Partner and the official exclusive product developer and supplier for the WorldSkills Mobile Robotics Competition.

About HunarPro Skilling

HunarPro Skilling is a hub for innovation & Research. Pioneered by experienced professionals from the industry, faculties, mentors & counsellors. HunarPro Skilling is unique in its teaching methodology and training standards. We promote innovation, research and entrepreneurship as part of our curriculum. HunarPro Skilling is completely dedicated to higher levels of interdisciplinary research and training in the fields of upcoming technologies with the strategy to build entrepreneurs and industry leaders.

About Studica

Studica is a leading supplier of educational technologies such as robotics and software products to students, teachers, faculty, and schools. With nearly 35 years of experience servicing the academic market, Studica also offers relevant solutions for STEM education and more. The authorized WorldSkills Mobile Robotics Collection, required to prepare for and compete in the WorldSkills Mobile Robotics competition, is available exclusively at Studica.
