

Creativity meets efficiency with this all in one production animation software

Recognised and used by the world's leading animation studios for 25 years, Harmony levels the playing field by bringing 2D animation and full production capabilities to students, freelancers, artists and professional animators alike. When the best is so accessible, why choose anything else?

“The speed at which I can now create complex backgrounds, thanks to the dynamic brush in Harmony, is astounding.”

Adam Philips
Animator, Illustrator and Designer

“Harmony keeps me curious and inquisitive. It's animation software with depth... So much to explore.”

Michel Gagné
Cartoonist

“Harmony makes it possible to level up our animation productivity without sacrificing quality... We're big fans.”

Tony Jaramillo
GitHub Animator / Illustrator

Harmony allows you to create artwork, animate, add special effects and sound, composite and do final production all in the same tool! It's your one-stop-shop for everything animation — the consolidation of 5 tools in 1.

Features

- Brush engine
- Palettes & painting
- Traditional paperless animation
- 2D/3D integration
- Deformers
- Cut-out animation
- Effects & compositing
- Export to game engine
- Pipeline integration

Benefits

- Showing your creativity on your terms
- Flexibility, functionality and fluidity of the tools allow you to create with the quality of traditional animation
- All-in-one tool for efficient animation, from drawing to final production
- Saves on cost and time
- Work with the digital solution chosen by the leading animation studios setting the standard

Just when the market thought
it couldn't get any better...
Here comes Harmony 17.

Harmony 17 New Features

Industry-leading, improved stylus responsiveness

Digital has never felt (or looked) so traditional

- New stabilizer for lines that are smoother than ever
- Stylus pressure responsiveness
- Tilt and angle responsiveness

Stay on-point with new rulers and guides

Drawing accuracy made simple / Don't be square

- Drawing ruler
- 3, 4, 5 point curved perspective guides (curvilinear)
- Isometric perspective guide

Add life to your animation

- Free form deformer
- Pumped up master controller
 - New stackable master controller (Stack-Wizard)
 - Show master controllers (find your master controllers)
 - Nudge function
 - Customization function including colour, naming, shape
 - Unroll Wizard
- RGB difference keyer (colour keyer)
- Motion blur

Upgraded performance and efficiency

- Camera view alignment guides
- Frame markers
- Preview cache for high-performance animation
- Export to mp4
- Animation preset settings (short-cuts)
